

Seeking GP Surgeon to join the Associate Clinic in Pincher Creek Alberta

The Associate Clinic is seeking a full time GP Surgeon to join our dynamic family practice. Our current 9 physician team includes 2 GP surgeons, 2 GP Anesthetists and 1 Endoscopist. Our entire physician team practices obstetrics and works together as a cohesive group both in clinic and hospital.

The Associate Clinic in Pincher Creek is a rural primary care clinic that strives to provide excellence in primary care and urgent care for the community and to enable patients to be partners in the management of their health care. Our clinic is co-located with the local hospital in rural southwestern Alberta.

We serve Pincher Creek and the surrounding communities, including many residents of the nearby Piikani reserve, Cowley, Lundbreck, and Waterton Park – approximately 10,000 patients in all. We also operate a satellite clinic on the Piikani reserve and provide service to Vista Village (a Good Samaritans designated assisted living facility) and Crestview Lodge.

Services are provided through the clinic by a team comprised of 9 physicians, a registered nurse, licensed practical nurses, medical office assistants, a social worker, a dietician, a pharmacist, respiratory therapists, receptionists, resident physicians and medical students. Administrative supports include onsite billing, medical transcription, 3rd party billing and an IT database expert. Our physicians enjoy practicing in an environment that has low physician attrition and potential for high income in a clinic which has been secured through a favourable, long term lease.

The right person to join our team will be a Family Physician with enhanced surgical skills/ GP surgery skills. Family Physicians with the desire to complete enhanced surgical skills training may also be considered. Responsibilities will include performing C-sections and other low risk surgical procedures, assisting visiting orthopedic and general surgeons, as well as providing surgical and emergency on- call services for our rural community.
